

Global Alliance for Rabies Control

PARACON

Pan-African Rabies Control Network

**World Health
Organization**

Driving progress towards rabies elimination

&

2nd international PARACON

12-14 September 2018, Johannesburg

NTDs are a proxy for disadvantage

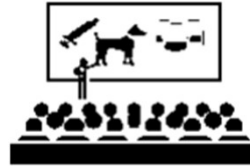

© World Animal Protection, Kenya, 2016

- preventable yet prevalent
- affect populations with little voice
- do not travel widely
- carry stigma and discrimination
- cause morbidity and mortality
- control challenged by circumstance
- limited data and research

- *ethical obligation!*

Prevent rabies through:

Awareness

Dog vaccination

Timely care

Meeting Objectives:

Disseminate new WHO recommendations on human rabies immunization and rabies control tools

Discuss results of Gavi Learning Agenda on rabies and progress made on rabies control/ programmes

Determine needs and next steps to reach 'Zero by 30'

Meeting Outcomes:

Progress, needs, next steps for impact

Country workplans & country and regional strategies to reach '0 by 30' including coordination across different sectors

Replicate learnings to increase impact

Uptake of new WHO position on rabies immunization and next steps on implementation

Clear pathway for data reporting rabies data

Advocacy and needs for catalytic support to countries identified

Conducting the meeting

- Focus on objectives and what we can achieve
- Participate in discussions, be constructive
- Network

- Facilitators to enable dialogue

- Stay on point
- Stay on time
- Stay with us not with your gadgets
- Have fun
